Bachelor of Adult Learning and Development
This program offers a contemporary approach to adult, workplace and community education and development. It has been designed for people without an existing university qualification who are working and leading in the adult education field in areas such as TAFE, private or Adult Community Education (ACE) providers, or industry/corporate sector training and development. This program is structured to be completed in just two years of full-time study. This is achieved by the recognition of prior learning (PPL) for the first year of the degree. The program offers flexible study options to suit working professionals who want to upgrade their formal qualifications and enhance their professional career.

Bachelor of Education (Early Childhood)*
This course prepares students to be early childhood educators in a range of childcare, kindergarten and preschool settings. Students complete a major in education and curriculum as well as leadership units in early childhood education. Throughout the course, students gain hands-on teaching experience by completing professional placements in early childhood centres, preschools and kindergartens. Students can enter this course after completing VCE (or equivalent). Alternatively, students who have completed a graded Diploma of Children’s Services (or equivalent) can enter the course and may be eligible for credit. Graduates will be qualified to teach from birth to five years of age.

Bachelor of Education (Early Childhood/Primary)*
This course prepares students to be primary school teachers and early childhood educators in a range of childcare, kindergarten, preschool and primary school settings. Students complete a major in education and curriculum as well as leadership units in early childhood and primary education. Throughout the course, students gain hands-on teaching experience by completing professional placements in early years settings and primary schools. Students can enter this course after completing VCE (or equivalent). Alternatively, students who have completed a graded Diploma of Children’s Services (or equivalent) can enter the course and may be eligible for credit. Graduates will be qualified to teach from birth to 12 years of age.

Bachelor of Education (Primary)*
This single degree prepares students to become primary teachers. Students complete a major in education and curriculum. Curriculum studies include English, mathematics, arts, humanities, science and health. Students also undertake priority units in areas such as health and wellbeing, citizenship, technology and special needs. The course also includes a flexible six-unit discipline sequence, where students can deepen their knowledge. Discipline studies include leadership in English and mathematics, languages, health and physical education or visual arts. Throughout the course, students gain hands-on teaching experience by completing professional placements in primary schools. Graduates will be qualified to teach in primary school settings.

Bachelor of Education (P-10)
This innovative and flexible degree is suited to students wishing to teach in primary and secondary schools from prep to year 10. The course covers all aspects of the P-10 curriculum, including English, maths and science education, creative arts education, history, Indigenous studies, social education, physical education and health. Students complete a major study in education, including learning and educational inquiry, child and adolescent development, curriculum, assessment and evaluation, and classroom practice. Students also choose two discipline studies from a range of study areas. This provides the content knowledge to teach in two secondary specialist teaching areas. Throughout the course, students gain hands-on teaching experience by completing professional placements in primary and secondary schools. Graduates will be qualified to teach in primary and secondary school settings.

Bachelor of Education (Special Education)
This innovative course prepares students for careers in primary and secondary teaching. In addition, the course includes a special education sequence which provides specialist knowledge and teaching skills in inclusive and special education. Students complete an education and curriculum major as well as specialist units such as behaviour disorders and positive behaviour support and effective instruction in special education. Throughout the course, students gain hands-on teaching experience by completing professional placements in primary and secondary schools. Graduates will be qualified to teach in primary and secondary school settings. They will also be qualified to teach in special needs schools.

Bachelor of Sport and Outdoor Recreation
Offering a dynamic combination of theoretical studies, professional placements and fieldwork programs, this degree will provide you with a qualification to work in the sport and outdoor recreation industry. Students will explore the relationship between physical activity, recreation and leisure, health and wellbeing, sustainability, leadership and education, and sports and movement studies. Students complete units in areas including coaching, adventure education and outdoor leadership. The course also incorporates exciting professional placements in coaching and instruction, leadership and programming, and sport education. Practical fieldwork takes place in a range of settings. It focuses on the employment and training needs of sport and outdoor recreation industry staff.
Bachelor of Sport and Outdoor Recreation

The Bachelor of Sport and Outdoor Recreation is designed to prepare students for careers in sport and outdoor recreation management, with an emphasis on the employment and training needs of sport and outdoor and programming, and sport education. Practical fieldwork takes place in a range of settings. It focuses on the employment and training needs of sport and outdoor and programming, and sport education. Practical fieldwork takes place in a range of settings.

Bachelor of Education (Special Education)

This program offers a contemporary approach to adult, workplace and community education and development. It has been designed for people without an existing qualification in teaching and learning, trade/post-trade certificates, and other relevant educational qualifications.

Bachelor of Education (Primary)*

This single degree prepares students to become primary teachers. Students complete units in areas such as health and wellbeing, citizenship, technology and special education.

Bachelor of Education (Early Childhood/Primary)*

This course and may be eligible for credit. Graduates will be qualified to teach from birth to five years of age.

Bachelor of Education (Early Childhood)*

Alternatively, students who have completed a graded Diploma of Children’s Services (or equivalent) can enter the course and may be eligible for credit. Graduates will be eligible to seek registration with the appropriate authorities to teach in early childhood centres, preschools and kindergartens in Victoria. Applicants for interstate and overseas positions are advised to check with local authorities.

Bachelor of Education (P-10)

Graduates will be eligible to seek registration with the appropriate authorities to teach in primary and secondary school settings. Applicants for interstate and overseas positions are advised to check with local authorities.

Bachelor of Adult Learning and Development

This program offers a contemporary approach to adult, workplace and community education and development. It has been designed for people without an existing qualification in teaching and learning, trade/post-trade certificates, and other relevant educational qualifications.

| **Bachelor of Arts and Bachelor of Education (Primary)**
This flexible double degree is suited to students who are interested in a Primary teaching career, as well as broadening their knowledge and expertise in subjects chosen from Arts disciplines. It will increase career choice and deepen understanding of diverse teaching areas. The Arts program includes more than 50 areas of study, including English, politics, music, history, sociology, journalism, linguistics, film and television studies, communications, and a range of language and cultural areas. Core education studies focus on teaching and children’s learning in areas such as English, mathematics, health and physical education and science. Students undertake a minimum of 80 days of satisfactory professional placement in schools which may include some overseas locations. This provides students with valuable teaching experience and connects the theoretical components of their studies with the practical aspects of teaching. | Peninsula | 1541 | 1 | 4 | 25,420 | 81.05 | 10 | 7 | 80 | 21 |
| **Bachelor of Arts and Bachelor of Education (Secondary)**
Suitable for students interested in pursuing a career in secondary teaching, this program also offers the flexibility for students to broaden their knowledge and expertise in a range of Arts disciplines. The double degree prepares students to teach in two secondary curriculum areas. Core education studies focus on teaching and learning as well as curriculum and assessment, professional engagement and adolescent development and learning. This double degree prepares students to teach in two secondary curriculum areas. Students undertake a minimum of 80 days of satisfactory professional placement, which provides valuable teaching experience and connects theory to the practice of teaching. | Clayton | 1641 | 1 | 4 | 25,420 | 80.25 | 10 | 7 | 80 | 21 |
| **Bachelor of Business and Bachelor of Sport and Outdoor Recreation**
Sport is a global business and its cultural and economic influences can have a profound impact on communities around the world. Combining sport and outdoor recreation with business studies in this double degree gives Monash graduates the opportunity to get a head start in an exciting and competitive industry. The Business degree covers the fundamental areas of business studies and is taught in a contemporary environment through the problem-based learning (PBL) approach. PBL is highly regarded by employers. The sport and outdoor recreation component offers a dynamic combination of theoretical studies and practical fieldwork programs in a range of settings. | Peninsula | 3749 | 1 | 4 | 34,000 | 80.45 | 9 | 7 | 75 | 20 |
| **Bachelor of Commerce and Bachelor of Education (Secondary)**
Students seeking to teach business and commerce-related subjects in secondary schools will find this double degree ideal. It will also suit those wanting to pursue a professional business career. The commerce degree will encompass core business units providing a solid framework for a business career, as well as electives chosen from fields including economics, accounting and management. Depending on the subjects studied, the requirements for membership of professional business/commerce associations may be satisfied. Secondary education studies focus on adolescent learning and the nature of education, classroom teaching and practice in schools, education and its relationship to society and planning, and implementing and evaluating secondary curriculum. Students undertake a minimum of 80 days of satisfactory professional placement which provides valuable teaching experience and connects theory to the practice of teaching. | Clayton | 2026 | 1 | 4 | 34,000 | 86.6 | 12 | 8 | 82 | 22 |
| **Bachelor of Music and Bachelor of Education (Secondary)**
Ideally suited to those with a passion for music, this double degree will enable you to share that passion with secondary school students. As well as a teaching career, students can also gain employment in music-related fields. Music studies cover the practical, theoretical, critical, historical and contextual aspects of music. Students will develop their skills in music performance and musicology, and music interpretation for performance and conducting. Core education studies focus on teaching and learning as well as curriculum and assessment, professional engagement and adolescent development and learning. Graduates will be prepared to teach in two secondary specialist teaching areas related to music. Students undertake a minimum of 80 days of satisfactory professional placement in schools, which may include some overseas locations. The placement program provides students with valuable teaching experience and connects the theoretical components of their studies with the practical aspects of teaching. | Clayton | 2025 | 1 | 4 | 26,730 | 77.8 | 9 | 7 | 75 | 20 |
| **Bachelor of Science and Bachelor of Education (Primary)**
A fantastic option for those with a passion for science and a desire to share scientific knowledge with others, this double degree gives graduates the choice of a career in science or in science education. Science studies will cover key scientific areas and the origins and methods of scientific inquiry. Students will choose major and minor subjects in order to specialise in a particular field of study. Discipline choices include astronomy and astrophysics, chemistry, physics, biology, psychology, atmospheric science, earth sciences, geography and environmental science, computer science and mathematics. Core education studies focus on teaching and children’s learning in areas such as English, mathematics, health and physical education, and science. Students undertake a minimum of 80 days of satisfactory professional placement, which provides valuable teaching experience and connects theory to the practice of teaching. | Peninsula | 3711 | 1 | 4 | 31,000 | 82.75 | 8.5 | 6 | 72.5 | 19 |

Bachelor of Science and Bachelor of Education (Secondary)*

This double degree gives students the choice of a career in science or science education. It is suited to those who are passionate about science and keen to have the option of teaching it at secondary school. The science degree covers key scientific areas and the origins and methods of scientific inquiry. A major and minor sequence is chosen and determines the two secondary specialist teaching areas graduates are qualified to teach. Specialist options include astronomy and astrophysics, chemistry, physics, biology, psychology, atmospheric science, earth sciences, geography and environmental science, computer science and mathematics. Core education studies focus on teaching and learning as well as curriculum and assessment, professional engagement and adolescent development and learning. Students undertake a minimum of 80 days of satisfactory professional placement in schools, which may include some overseas locations. The placement program provides students with valuable teaching experience and connects the theoretical components of their studies with the practical aspects of teaching.

Bachelor of Sport and Outdoor Recreation and Bachelor of Education (Primary)*

Students wanting to combine a passion for sport and outdoor recreation with the rewards of a career as an educator will find this double degree perfect. You will undertake studies in sport and outdoor recreation simultaneously with studies covering the theory and practice of primary teaching. A minimum of 80 days of satisfactory professional placement is undertaken. This provides valuable teaching experience and connects theory to the practice of teaching. Graduates will be confident and equipped to teach children to develop their creative, physical, intellectual and social abilities, as well as their literacy and numeracy skills. In addition, they will be qualified to work in a range of positions in the sport and outdoor recreation industries.

Bachelor of Sport and Outdoor Recreation and Bachelor of Education (Secondary)**

If you want to combine a passion for sport and outdoor recreation with a career in secondary school teaching this is an ideal course. The double degree prepares students to be confident secondary teachers with specialist skills in physical education, outdoor education and/or another specialist teaching area such as business, history or biology. Core education studies focus on teaching and learning as well as curriculum and assessment, professional engagement and adolescent development and learning. This double degree prepares students to teach in two secondary specialist teaching areas. Students undertake a minimum of 80 days of satisfactory professional placement, which provides valuable teaching experience.

Bachelor of Visual Arts and Bachelor of Education (Primary)**

This is an ideal course for students wanting to gain the knowledge and skills for a career in creative and visual arts or in visual arts education. Students will develop their artistic skills in one or more visual media, while also giving them the chance to share their passion and artistic creativity with secondary school students. The visual arts program offers a range of choices, including theory of art and design, painting, sculpture, printmedia, photomedia, theory of art and design, and visual arts studies. Core education studies focus on teaching and children’s learning. Students complete units in learning areas, including English, the arts, mathematics, health and physical education, science, the humanities, and information and communication technologies. They will study teaching and learning theories for primary school children and curriculum development and implementation. A minimum of 80 days of satisfactory professional placement is undertaken, which provides valuable teaching experience and connects the theory to the practice of teaching.

Bachelor of Visual Arts and Bachelor of Education (Secondary)**

This double degree is suited to students who are interested in developing their artistic skills in one or more visual media, while also giving them the chance to share their passion and artistic creativity with secondary school students. The visual arts program offers a range of choices, including theory of art and design, painting, sculpture, printmedia, and photomedia. Core education studies focus on teaching and learning as well as curriculum and assessment, professional engagement and adolescent development and learning. This double degree prepares students to teach in two secondary specialist teaching areas related to visual arts. Students undertake a minimum of 80 days of satisfactory professional placement, which provides valuable teaching experience.

---

International qualifications

**Monash University**

*Special note about the Gippsland campus*

Monash University and the University of Ballarat are exploring a proposition to create an expanded, regionally focused university. Should the proposition be approved, the campus is expected to offer a range of courses that bring together the strengths of both Monash University and the University of Ballarat from 1 January 2014. If the proposition is approved, students will be admitted into courses offered by the expanded university and Monash University will not be admitting new students (except from agreed pathways) into courses at the Gippsland campus.

As course offerings may change, please consult the Monash website (www.monash.edu/gippsland) for further information prior to applying to study at the Gippsland campus.

---

2013 Fee (A$): This fee is the annual average fee representing 48 credit points of study. Fees are adjusted annually. Please see www.monash.edu/fees for updates.
### Bachelor of Visual Arts and Bachelor of Education (Secondary)*

This double degree prepares students to teach in two secondary specialist teaching areas. Students undertake a minimum of 80 days of satisfactory professional placement, which provides valuable teaching experience and connects theory to the practice of teaching. Graduates will be eligible to seek registration with the appropriate authorities to teach in secondary schools in Victoria. Applicants for interstate and overseas positions are advised to check with local authorities.

**Program Overview:**
- Focus on teaching and learning as well as curriculum and assessment, professional education, outdoor education and/or another specialist teaching area such as business, history or biology.
- Core education studies cover the theory and practice of primary teaching. A minimum of 80 days of satisfactory professional placement is undertaken, which provides valuable teaching experience and connects the theoretical components of their studies.
- Graduates will be eligible to seek registration with the appropriate authorities to teach in secondary schools in Victoria. Applicants for interstate and overseas positions are advised to check with local authorities.

**Entry requirements listed in this brochure are for applicants who commence Monash University Foundation Year (MUFY) in 2013/2014**

*Pending final accreditation by the Australian Children’s Education and Care Quality Authority (ACECQA) and/or the Victorian Institute of Teaching (VI).*

This course will require study across multiple campuses. For further information please consult the Monash online Course Finder.

*This is a new or revised course offered in 2014. Please consult the faculty for further information.*

**Extra information:** This is an accelerated course where you will be required to undertake more than the Standard Annual Load of 48 credit points in Year 3 and/or Year 4 in order to complete the course in four calendar years. The fee quoted is based on 48 credit points of study for one standard year. Therefore you will be required to pay a higher fee in the year(s) where more than the 48 credit points are required.
Why engineering?

Engineer literally means "to make things happen". As an engineer you will get to apply science and mathematics in a practical way to develop new technologies and improve existing ones. Engineers possess a rare combination of skills and qualities that place them in demand all over the world, in many different industries. They are creative and imaginative, yet analytical and technical – with an excellent sense of judgement.

An engineer’s career is diverse, interesting and can be anywhere in the world. Currently engineers are in demand and can earn excellent money. A recent study conducted by the United Nations Educational, Scientific and Cultural Organization (UNESCO) indicated a serious shortage of engineers in many countries.

As a qualified engineer you will also be equipped to work in many areas outside of engineering, such as management, banking and consulting. Many engineers go on to become CEOs of major corporations. Problem-solving and planning skills, and their focus on the future and continuous improvement, make engineers competent business leaders.

The Monash difference

The Academic Ranking of World Universities (2012) rates Monash as one of the top four universities in Australia for engineering/technology. Here are some reasons why:

— You can complete your engineering qualification in just four years with a Monash Bachelor of Engineering, or study for just one year longer and graduate with a double degree.

— The Bachelor of Engineering has a common first year, allowing you to better understand engineering and its fields before deciding which engineering discipline to pursue from level two.

— Monash offers a range of double degrees to broaden your career options; for the combinations available please refer to the table on page 47.

— A large number of scholarships, awards and prizes are offered to future and current students, including the Monash International Merit Scholarship offering a total value of $50,000 (based on a five-year double degree). The Faculty of Engineering also offers a range of international scholarships, bursaries and awards.

— Monash Engineering hosts outstanding facilities, including the largest wind tunnel in the Southern Hemisphere, fully equipped optical communications laboratories and the Centre for Electron Microscopy.

— If you achieve an H1 honours weighted average in your undergraduate studies we guarantee you a scholarship to undertake a higher degree by research (master’s or PhD).

Michelle Ng
Bachelor of Commerce and Bachelor of Engineering in the field of Electrical and Computer Systems

Michelle really enjoyed maths and science at school and was interested in how to apply these subjects to real-life situations. “Engineering seemed like a great choice because it combined my interest in maths, science and industry applications.”

“Monash Engineering seemed more practical than other universities because the subjects offered have hands-on aspects, meaning that students are taught how to deliver a finished product. The education is engaging as we get to work in teams and get involved in practical applications of the theory discussed in lectures.”

Michelle completed her vacation employment at GM Holden, where she was awarded the AutoCRC Undergraduate Prize for her final-year project presentation. Michelle was commended for her excellent communication skills and overall professionalism.

“I aim to secure a place in a graduate program that has the potential for international opportunities and hopefully get the opportunity to work overseas one day.”
